DETAIL ACTION

Notice to Applicant(s)

- 1. This application has been examined. Claims 1-30 are pending.
- 2. The prior art submitted on July 07, 2005 has been considered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 4-10, 14-18, 20-22 and 25-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Adachi (5,430,655).
- 5. As per claims 1, 10 and 22, Adachi discloses the system, method and processor-recordable medium which includes means for obtaining current position of the vehicle (see at least column 3, lines 16-25), means for determining a current direction of travel of vehicle (see at least column 3, lines 20-23), means for identifying a point of interest as a functions of the current position of the vehicle and the current direction of travel of the vehicle (see at least column 5, lines 26-31), and means for communicating the point of interest to the occupant of the vehicle (see at least figure 1, item 15 and figure 7).

Application/Control Number: 10/780,029 Page 3

Art Unit: 3661

6. As per claims 4, 5, 14, 15, 25, 26, Adachi further discloses the identification of the street on which the vehicle is located, and list of intersections along the street (see figure 7).

- 7. As per claims 6, 7, 9, 16, 17, 20, 27, 28 and 30, Adachi also discloses that at least one intersection is communicated to the occupant in response to the movement of the vehicle (see figures 7-10 and the related text).
- 8. As per claims 8, 18 and 29, Adachi further discloses an input device to receive input from the occupant and the navigation system is configured to communicate the successive intersection points to the occupant of the vehicle (see at least figure 1, item 16 and the related text).
- 9. As per claim 21, Adachi discloses a memory device for storing the retrieved data (see at least figure 1, item 12).

Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Application/Control Number: 10/780,029

Art Unit: 3661

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

- 12. Claims 2, 3, 11-13, 19, 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adachi as applied to the claims above, and further in view of Schmischkle et al. (6,078,863).
- 13. With respect to claims 2, 11 and 23, Adachi disclose means for displaying a graphic representation of the point of interest as shown in at least figure 7. Adachi does not disclose that the graphic representation of the vehicle is displayed. However, Schmischkle et al. suggest a method and apparatus for preparing route guide information for the driver of a vehicle which includes a display for graphically displaying both the intersections and the vehicle as shown in at least figure 1. It would have been obvious to an ordinary skill in the art at the time the invention was made to incorporate the teaching of Schmisckle et al. into the system of Adachi in order to provide the system with the enhanced capacity of displaying the current position of the vehicle on the display together with the intersections to let the occupant know exactly where he/she is in relative with those intersections.
- 14. With respect to claims 3, 12, 13, 19 and 24, Adachi does not disclose an audio device for generating an audio indicator of the intersection point. However, Schmischkle et al. do suggest that feature in at least column 2, lines 11-17 and lines 41-47). It would have been obvious to an ordinary skill in the art to incorporate the teaching of Schmischkle et al. into the system of Adachi in order to not only provide the optical display device having a turn arrow and further lines for the cross street, but also

Art Unit: 3661

provide a voice command for the occupant of the vehicle, thereby improving the safety for the occupant.

Conclusion

- 15. All claims are rejected.
- 16. The following references are cited as being of general interest: Kaneko et al. (5,729,109), Nanba et al. (5,739,772), Morimoto et al. (6,018,697), Sugiura et al. (6,119,066), Uchigaki (6,138,073), O'Shea (6,324,472), Deworetzki (6,633,813), and Komatsu (6,859,724).
- 17. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Q. Nguyen, whose telephone number is (571) 272-6966. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black, can be reached on (571) 272-6956.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to the Official Fax Center: (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
